

EDUCATIONAL THOUGHTS LIFE AND

Sushil Kumar Dadhwal, Ph. D.

Shanti PG College of Education Kailash Nagar Distt. Una (HP)

Abstract

Kautalya has stated that education "Training for the country and love for nation". Tagore told, education is that "which makes one's life in harmony with all existences thus enables the mind to find that ultimate truth which emancipates us the bondage of the dust and gives us the wealth, not of things but of inner light, not of power but of love, making this truth its own and giving expression to it". Aurovindo has considered that education as "helping the growing soul to draw out that is in itself". Sawami Dayanand considered education as a means of character formation and righteous living. Johan Dewey, stated that "Education is the development of all those capacities in the individual which enable him to control his environment and fulfil his possibilities". T.P. NUNN has defined that "Education is the complete development of individuality of that child that he can make his contribution to human life according to the best of his capacity."

Introduction

BY education we mean educating the younger generation and the adults to develop proper desirable behaviour and become the befitting members of the society, making use of social contributions and benefitting the society by their own productive or creative contributions. Hence it includes two important processes called socialisation and acculturation. Socialisation is the process of enabling the child to become a useful and socially efficient individual. Acculturation is the process of cultural conditioning of man.

Value involves individual feelings, ideas, and beliefs an individual operates according to system of values. Every decision he makes, comes from within, conscious system of life. T Pattern parson, holds, "value is an element of shared symbolic system which serves a criterion or standard for selection among the alternatives of orientation which are intrinsically open in situation." R. Borosdi, states that "Value are emotional judgements. They are generated by feelings not cognitions. They are emotional, not intellectual judgements. Kane states that "Values are the ideas, beliefs or norms which a society or majority of a society's members hold." As per the dictionary of education, defines values "as the thing in which people are interested things, they want to be or become, feel as obligatory worship or enjoy."

Following are very important life and educational thoughts,

- When you have faith in God that means you have permanent source to rely upon.
- Firm faith in your performance means that you have achieved, that you have desired in your life.

- Belief in yourself and be yourself.
- positive thinking is key to success.
- The peaceful mind generates power.
- When mind can rest and natural sleep, that means you are away from depression.
- It is no use weeping over the death of a person but it is is needed to serve him for which he is alive and facing illness.
- Sweet tongue sometimes solves so many problems of life.
- Sweet tongue sometimes solves so many problems of life.
- Your attraction towards an object means that you that you have liked its exterior.
- Prayer and meditation sometimes make a good substitute for a person.
- Co-operation with others means that you have made place in the society.

Conclusion:

In this article an attempt has been made to convey the message through this article to new generation to prepare their selves to face the future challenges, because due to the advancement of science and technology, our value system has totally changed. There is public cry regarding values. Values are degrading day by day due to this advancement. Government has and has been taken steps to bring the quality in the education system, but

without existing values in the society, it is not possible. Value is the experiences of life. The writer wants to share his and best educationists experiences and views through this article and develop values among the the members of the society. The writer hopes that this article would be very helpful to the students, teachers and members of the society, to face the future challenges and develop the values among the members of the society, removing the frustration, depression and create peaceful atmosphere. No doubt, the students are getting good knowledge and they are scoring good percentage, but they do not know about the need of the society in real sense. The need of the society in the present era is peace. Peaceful environment does not take place without good moral values among the members of the society. For this the life and educational thoughts and actions which have been mentioned above are should be properly implemented in the lives by the students and others members of the society, otherwise the peaceful atmosphere cannot exist in the society. This article in the form of educational thoughts and action would help the teachers, students and other members of the society to create the peaceful atmosphere for the progress and development of the society in the real sense.
